WHY VALKYRIE?

Digital Asset Focus:

Valkyrie is a digital asset focused investment firm. We are committed to expanding access to this emerging asset class.

Deep Traditional Experience:

The Valkyrie team has deep expertise in traditional asset management with extensive backgrounds in building, launching, and scaling financial products with major financial firms.

Education First:

We believe that education allows for more responsible investing and are committed to leading in expanding resources for investors.

VALKYRIE FUNDS

Valkyrie Funds LLC ("Valkyrie Funds") is a specialized alternative financial services firm at the intersection of traditional finance and the emerging cryptocurrency sector whose affiliates aim to offer asset management, research and other services. Headquartered in Nashville, with offices across the United States, Valkyrie Funds aims to provide exposure to the emerging digital asset class through traditional financial vehicles. Valkyrie Funds is led by seasoned asset managers who have previously launched multiple ETFs, publicly traded funds and ETPs, including digital asset funds with backgrounds across Guggenheim Partners, UBS, Chicago Board of Trade, Chicago Mercantile Exchange, and The World Bank.

Senior Portfolio Manager
Vident

Steven McClurg, Chief Investment Officer of Valkyrie

Steven McClurg has considerable finance and fintech experience. Most recently, Mr. McClurg founded Theseus Capital, a blockchain-powered asset management platform, followed by joining blockchain-focused merchant bank, Galaxy Digital, where he continued as Managing Director, building their asset management and public funds businesses. Most relevant, Mr. McClurg was a Managing Director at Guggenheim Partners, where he was a portfolio manager and responsible for portfolio construction and strategy for fixed income and private equity. He also has experience in leadership roles in technology companies such as Electronic Arts. Mr. McClurg holds an MS and an MBA from Pepperdine University, where he has served as an adjunct professor.

Bill Cannon, Head of Portfolio Management at Valkyrie

Prior to joining Valkyrie, Bill Cannon was a Managing Director at Guggenheim Partners Investment Management, where he was member of the insurance portfolio management division responsible for \$80 billion of assets under management. Before that, Mr. Cannon worked at the Chicago Mercantile Exchange and the Chicago Board Of Options Exchange as a derivatives broker for equity index and interest rate futures and options. Mr. Cannon earned a BA in Chemistry from the University of Vermont and an MBA from the Quinlan School of Business at Loyola University Chicago.

Rafael Zayas, CFA, Senior Vice President of Vident

Mr. Zayas has over 15 years of trading and portfolio management experience in global equity products and ETFs. He is SVP, Head of Portfolio Management and Trading, specializing in managing and trading of developed, emerging, and frontier market portfolios. Prior to joining Vident, he was a Portfolio Manager at Russell Investments where he oversaw over \$5 billion in quantitative strategies across global markets, including emerging, developed and frontier markets and listed alternatives. Before that, he was an equity Portfolio Manager at BNY Mellon Asset Management, where he was responsible for \$150 million in internationally listed global equity ETFs and assisted in managing \$3 billion of global ETF assets. Mr. Zayas holds a BS in Electrical Engineering from Cornell University. He also holds the Chartered Financial Analyst designation.

Ryan Dofflemeyer, Senior Portfolio Manager of Vident

Mr. Dofflemeyer has over 16 years of trading and portfolio management experience across various asset classes including both ETFs and mutual funds. He is Senior Portfolio Manager for Vident, specializing in managing and trading of global equity and multi-asset portfolios. Prior to joining Vident, he was a Senior Portfolio Manager at ProShares for over \$3 billion in ETF assets across global equities, commodities and volatility strategies. Before that, he was a Research Analyst at the Investment Company Institute in Washington DC. Mr. Dofflemeyer holds a BA from the University of Virginia and an MBA from the University of Maryland.

DISCLOSURES

This investment case does not constitute a recommendation of any investment strategy or product for a particular investor. Investors should consult a financial advisor/financial consultant before making any investment decisions.

Investing involves risks. The loss of principal is possible. The Fund's investment objectives, risks, charges and expenses should be considered before investing. The fund may not be suitable for all investors. The prospectus contains this and other important information, and it may be obtained at <https://valkyrie-funds.com/>. Read it carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Any applicable brokerage fees and commissions will reduce returns.

The Fund invests in bitcoin futures contracts. The Fund does not invest directly in or hold bitcoin. The price of bitcoin futures should be expected to differ from the current or "spot" price of bitcoin. As a result, the performance of the Fund should be expected to differ from the performance of the spot price of bitcoin. Futures contracts are subject to margin requirements, collateral requirements and daily limits that may prevent the Fund from achieving its objective. The market for bitcoin futures may be less developed, less liquid and more volatile than more established futures markets.

Management Risk. The Fund is subject to management risk because it is an actively managed portfolio. The Adviser will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that the Fund will meet its investment objective.

Bitcoin Investing Risk. The Fund is indirectly exposed to the risks of investing in bitcoin through its investments in bitcoin futures. Bitcoin is a new and highly speculative investment. The risks associated with bitcoin include the following:

Bitcoin is a new technological innovation with a limited history. There is no assurance that usage of bitcoin will continue to grow. A contraction in use of bitcoin may result in increased volatility or a reduction in the price of bitcoin, which could adversely impact the value of the Fund. The Bitcoin Network was launched in January 2009, platform trading in bitcoin began in 2010, and Bitcoin Futures trading began in 2017, each of which limits a potential shareholder's ability to evaluate an investment in the Fund.

The Fund's investments are exposed to risks associated with the price of bitcoin, which is subject to numerous factors and risks. The price of bitcoin is impacted by numerous factors, including:

The total and available supply of bitcoin, including the possibility that a small group of early bitcoin adopters hold a significant proportion of the bitcoin that has thus far been created and that sales of bitcoin by such large holders may impact the price of bitcoin;

Global bitcoin demand, which is influenced by the growth of retail merchants' and commercial businesses' acceptance of bitcoin as payment for goods and services, the security of online bitcoin exchanges and public bitcoin addresses that hold bitcoin, the perception that the use and holding of bitcoin is safe and secure, the lack of regulatory restrictions on their use, and the reputation regarding the use of bitcoin for illicit purposes;

Global bitcoin supply, which is influenced by similar factors as global bitcoin demand, in addition to fiat currency (i.e., government currency not backed by an asset such as gold) needs by miners and taxpayers who may liquidate bitcoin holdings to meet tax obligations;

Investors' expectations with respect to the rate of inflation of fiat currencies and deflation of bitcoin;

Foreign exchange rates between fiat currencies and digital assets such as bitcoin;

Interest rates;

The continued operation of bitcoin exchanges in the United States and foreign jurisdictions, including their regulatory status, trading and custody policies, and cyber security;

DISCLOSURES

Investment and trading activities of large investors, including private and registered funds, that may directly or indirectly invest in bitcoin;

Regulatory measures, if any, that restrict the use of bitcoin as a form of payment or the purchase or sale of bitcoin, including measures that restrict the direct or indirect participation in the bitcoin market by financial institutions or the introduction of bitcoin instruments;

The maintenance and development of the open-source software protocol of the Bitcoin Network;

Increased competition from other cryptocurrencies and digital assets, including forks of the Bitcoin Network;

Developments in the information technology sector;

Global or regional political, economic or financial events and situations;

Investor or Bitcoin Network participant sentiments on the value or utility of bitcoin; and

The dedication of mining power to the Bitcoin Network and the willingness of bitcoin miners to clear bitcoin transactions for relatively low fees.

Negative developments in any of these factors could adversely impact an investment in the Fund.

A decline in the adoption of bitcoin could negatively impact the performance of the Fund. As a new asset and technological innovation, the bitcoin industry is subject to a high degree of uncertainty. The adoption of bitcoin will require growth in its usage for various applications that include retail and commercial payments, cross-border and remittance transactions, speculative investment and technical applications. Adoption of bitcoin will also require an accommodating regulatory environment. A lack of expansion in usage of bitcoin could adversely affect the bitcoin futures contracts in which the Fund invests. In addition, there is no assurance that bitcoin will maintain its value over the long-term. The value of bitcoin is subject to risks related to its usage. Even if growth in bitcoin adoption occurs in the near or medium-term, there is no assurance that bitcoin usage will continue to grow over the long-term. A contraction in use of bitcoin may result in increased volatility or a reduction in the price of bitcoin, which would adversely impact the value of the Fund's shares. Recently, bitcoin has come under scrutiny for its environmental impact, specifically the amount of energy consumed by bitcoin miners. Some companies have indicated they will cease accepting bitcoin for certain kinds of purchases due to such environmental concerns. To the extent such concerns persist, the demand for bitcoin and the speed of its adoption could be suppressed.

Bitcoin trading prices are volatile and shareholders could lose all or substantially all of their investment in the Fund. Speculators and investors who seek to profit from trading and holding bitcoin generate a significant portion of bitcoin demand. Bitcoin speculation regarding future appreciation in the value of bitcoin may inflate and make more volatile the price of a bitcoin. As a result, bitcoin may be more likely to fluctuate in value due to changing investor confidence in future appreciation in the price of bitcoin.

The Fund is distributed by ALPS Distributors, Inc.

This is a new ETF with limited operating history.
